### **What is Litter?**

**Litter is the result of laziness, whether by individuals or companies. It affects every aspect of our lives and homes. Let's talk about it.**

**Litter has many forms and sources. Litter always originates from humans. People throw trash out of their vehicles or leave it behind when they go on outings. It can be anything from a broken bottle to candy wrappers.**

**Litter, whether big or little, can drastically affect our environment for many years to come. It can wash up on the shore at your favorite beach, ruining your vacation. Litter can spread diseases, putting all of us in danger.**

**Litter, such as broken bottles, can result in injury to humans and wildlife. Discarded medical supplies can spread disease. Chemicals can contaminate water sources, potentially harming us all.**

**Quit being lazy and clean up after yourself. It is up to all of us to take care of our planet.**
